

GET PATIO FLAGSTONE PERFECTION... THE PURPLE WELLIES WAY!

1

Our first job is to apply a pre-treatment of our smart clean technology weedkiller, moss removal and algae busting solutions. All our treatments are pet-friendly and kind to the environment.

2

We then use our special cleaning formulation (with four secret ingredients) to eliminate any unsightly black lichen spots.

3

It's then time to apply our elbow grease to agitate the cleaners into the surface to loosen up any moss, algae and debris that is ingrained deep into the joints between the paving slabs.

4

We undertake a full clean using our rotary-headed washing system that's tough on grime (but kind to the underlying material).

5

To finish the service, we thoroughly rinse and sanitise all your patio or courtyard areas and remove any mess or debris from your property, leaving you with a sparkling clean outdoor space to enjoy.

6

We also offer optional patio cleaning services such as the removal of all loose pointing and application of weedkiller into all joints, which we then seal with a moisture setting compound which inhibits weed growth.

7

Another optional extra is the application of Smartseal natural stone sealers. These high-quality impregnating sealers work their magic by filling in all the microscopic voids in a natural stone substrate to protect against the elements.

8

Choose your finish! Whether you prefer a dry, natural effect or prefer a glossy wet-look sheen to your patio, we can apply natural stone sealers that restore the colour and aesthetics of your flagstones.

9

Our annual maintenance package keeps your flagstones, patios and courtyards from neglect with an application of weedkiller & moss inhibitor and a supply of ice thaw pellets for winter to keep your surfaces safe.
