

GET FRESH, CLEAN, GREAT LOOKING GRAVEL DRIVEWAYS... THE PURPLE WELLIES WAY!

1

The best and most effective way for our team to remove weeds from your gravel driveway is by hand. Only then will we apply our glyphosate weed and root killer to the surface of the gravel and rake it level to remove any trace of debris or weeds.

2

We'll then apply our smart clean solution especially formulated for your gravel driveway and leave it to work its magic by soaking deep into the existing gravel and break down all known contaminants.

3

Once our cleaners have taken effect, we'll thoroughly rinse the stones and sanitise them, before removing any debris and mass to ensure your driveway is clean, fresh and oozing kerb appeal.

4

Over the years, the gravel on your driveway may need an occasional top up – and we can arrange this for you. We'll work with you to match the new gravel to the existing stone size and colours and then ensure it's raked level for a superior finish. We also provide an optional annual maintenance of application of weed and organic solution to help eliminate the growth of weeds and gravel top up as required.
